

## Team Activities. The Safe!@Hepburn Springs.

### Activity Outline.

**The Safe!** will have your delegates walking and talking and having fun in a delightful natural and historical setting. Commencing from the Hepburn Springs Mineral Water Reserve, our **GPS** based **Treasure Hunt** (GeoCaching), involves small teams using our hand held GPS units to hunt for items hidden along a forest trail circuit, which provide the combination to the 'Safe', (also hidden). Sampling Hepburn's famous waters is naturally included.

We can also tailor your conference talking points, themes or reflections into the experience.

*The Safe! combines well with the optional **Mineral Water Masterclass** – guided tastings of Hepburn's famous mineral waters. Or enjoy a round of **Kubbs plus lawn games** or a **guided walk** in historical and forest settings.*

### The GPS Treasure Hunt. How it works.

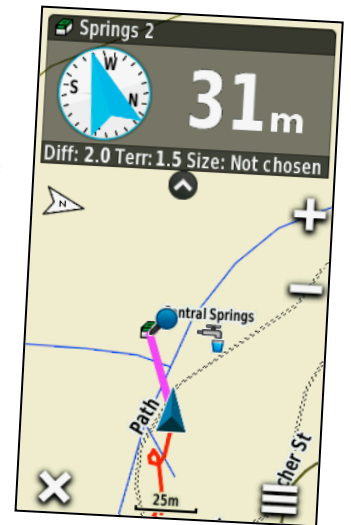

Each team has seven concealed coloured marker posts per team to find along the forest circuit. The GPS guides the teams to 'zero' in on their particular marker posts by providing them with the distance and direction to the marker posts, as shown on the graphic below.

Upon finding their marker posts, the teams face their next challenge; to unravel the combination of The Safe! by answering a series of **cryptic clues** located at each marker post. Finally, teams must find The Safe itself, back near the start, and if they have successfully cracked the

combination, can open 'The Safe' and enjoy the contents. The Safe! takes around 1 hour to complete and is rated easy for people in good general health.

The GPS unit will help you zero in on your marker post, and your clue cards.

Locate the marker posts and solve the clues to the Safe's combination.

Finally, hunt down the Safe and enter your combination. Enjoy your winnings!
