

Team Activities - The Safe! at LakeHouse. Lake Daylesford.

Activity Outline.

Work as a team, enjoy the beauty of Lake Daylesford and sample its mineral springs, and most importantly have some fun while you use our hand held GPS units for a high tech **Treasure Hunt**. Starting directly from The LakeHouse, the goal is to hunt down our hidden marker posts around Lake Daylesford and the adjoining mineral springs with hand held GPS units. They contain the **clues** to the combination to a '**Safe**', (one per team), hidden back at the Lakehouse. Extend your team further with the **Lake Daylesford Challenge**, which includes artistic, musical and costume fun, as well as other surprises.

How does it work?

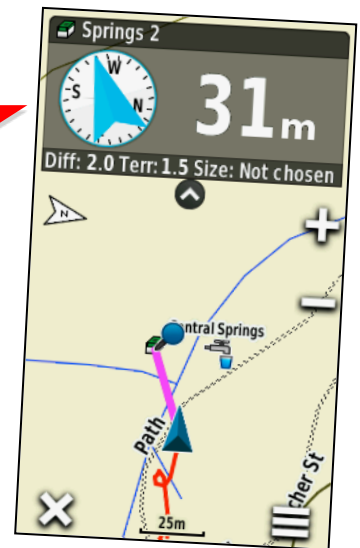

The GPS units guide the teams to 'zero' in on twelve hidden marker posts by providing them with the distance and direction to the various marker posts, as shown in the graphics below. Upon finding their marker posts, the teams face their next challenge; to unravel the combination of The Safe by responding to a series of **cryptic clues**, located at each marker post. Finally, teams must find **The Safe!** itself and if they have successfully cracked the combination, can open 'The Safe' and enjoy the contents.

This healthy outdoor activity is ideal for multiple teams of 3-4. Rated easy for people in good general health. 90min - 2 hrs in duration.

Your GPS unit and screen image.

The pointer and map will give you the direction, while the distance counter counts down as you close in on your targets, the marker posts.

Find the marker posts and solve the clues to discover the combination to The Safe.

Finally, hunt down the Safe and enter your combination. Enjoy your winnings!
